

Meteorologist for a Day

Present a Station Model for the local forecast:

Using information from the Weather Map activity

Create a station model for the day's weather (don't include air pressure or trend) (Ms. Williams will provide materials)

Explain to the class what the weather is like for your day?

Make sure you tell the class the date **and** year!

Present the National Forecast

How many fronts are happening in the United States? Where are they coming from? Where are they moving to? What kind of precipitation can we expect from each front?

How many high pressure masses are in the United States? Where are they?

How many low pressure masses are in the United States? Where are they ?
